

Catalogue of questions for distance world tour

for distance is an art performance to raise awareness of war and of collectively and graciously keeping your distance.

Developed during the pandemic for meeting up outdoors. People are painted or identified by felt fabric, and stand or dance symbolically in geometric spaces keeping minimum distances from one another.

These formations are spreading worldwide like flash mobs, are being welcomed by city administrations and can be held by cultural institutions or other interested groups.

for distance involves endeavours for gracious commonality and gladly keeping your distance. Whether it is awareness of peace, freedom, reconciliation, commonality, a culture of remembrance for the Covid pandemic, colourfulness, across borders or nationally – no matter what religion or ethnicity you belong to, it still stands for security and prevention. The project for joy and a more beautiful world always fits.

Here is our text for the sound **for distance**

We keep our distance, yet we belong together.

We look at ourselves.

Our home is the whole world, and we are all one family.

Let's keep our distance, for we all belong together.

We want peace, we want freedom.

We celebrate distance gladly and graciously.

We are happy when the whole world is reconciled and makes peace.

The environment knows no boundaries.

We look at our Earth, mountains, rivers, lakes, forests, meadows, fields, animals, environment, resources and fellow humans, because we only have our one world.

Let us retain our critical thoughts, which help us move forward. What is "in" today can already be "out" tomorrow.

We keep our distance, yet we keep together.

Concluded between

.....
.....

as the Client (referred to as such in brief hereinafter) on the one side and
Mr

Reinhard Eberhart
Trattnigsteichstraße 26
9535 Schiefling, Austria
